

# Flexible Instructional Day Plan

**Program:** Sports Medicine and Rehabilitation Professions

**Contact Information:** rcastro@steelcentertech.com

**Attendance:** Attendance will be taken during one of the google meets sections for the day. The first meeting will take place at **9am** and the second meeting will take place at **12pm**. Students must attend **1 session** to be considered present for the day. If you are not present during the meeting you cannot submit the assignment for the day.

**Virtual Meeting Lesson:** When a virtual day is established for Steel Center, students are required to log onto Canvas and Google Meets. On the sports medicine's home page will be the Google Meets link and it will be listed in announcements. This learning session will last approximately 1 hour and students will have time for an extended hour after the session to ask questions. If students have a question after the first hour session is over, they are to email me and we can meet back on the link. Questions will only be answered within the first hour after the learning session has been completed.

**Technology Concerns:** Students should access the Canvas page on their chromebooks, but their cell phones may be used as well for both Canvas and Google Meets.

If students have a technology concern a hard copy of an adapted technology lesson can be given out. We will send a letter to these students with resources for flexible instruction days.
