RE: Nationwide TikTok Threats

Dear Steel Center Students, Parents, Staff, and Community:

Earlier today, school administrators across the country were made aware of a social media posts on TikTok making general shooting and bomb-related threats to schools. These posts are being shared nationally and are specific to Friday, December 17. Our local law enforcement partners have been notified of these social media threats and school administrators in Allegheny County discussed this at our weekly county-wide meeting this afternoon. **At this time, Steel Center is not aware of any specific threat to our school.** Should that change, we will follow all emergency response procedures in partnership with law enforcement.

Steel Center takes all threats of violence seriously and urges everyone to report any information about school-related violence to a trusted adult, a school administrator, local law enforcement (call 911), or through the Safe2Say app.

Sincerely,

Kevin E. Rice
Executive Director
