Dear students,

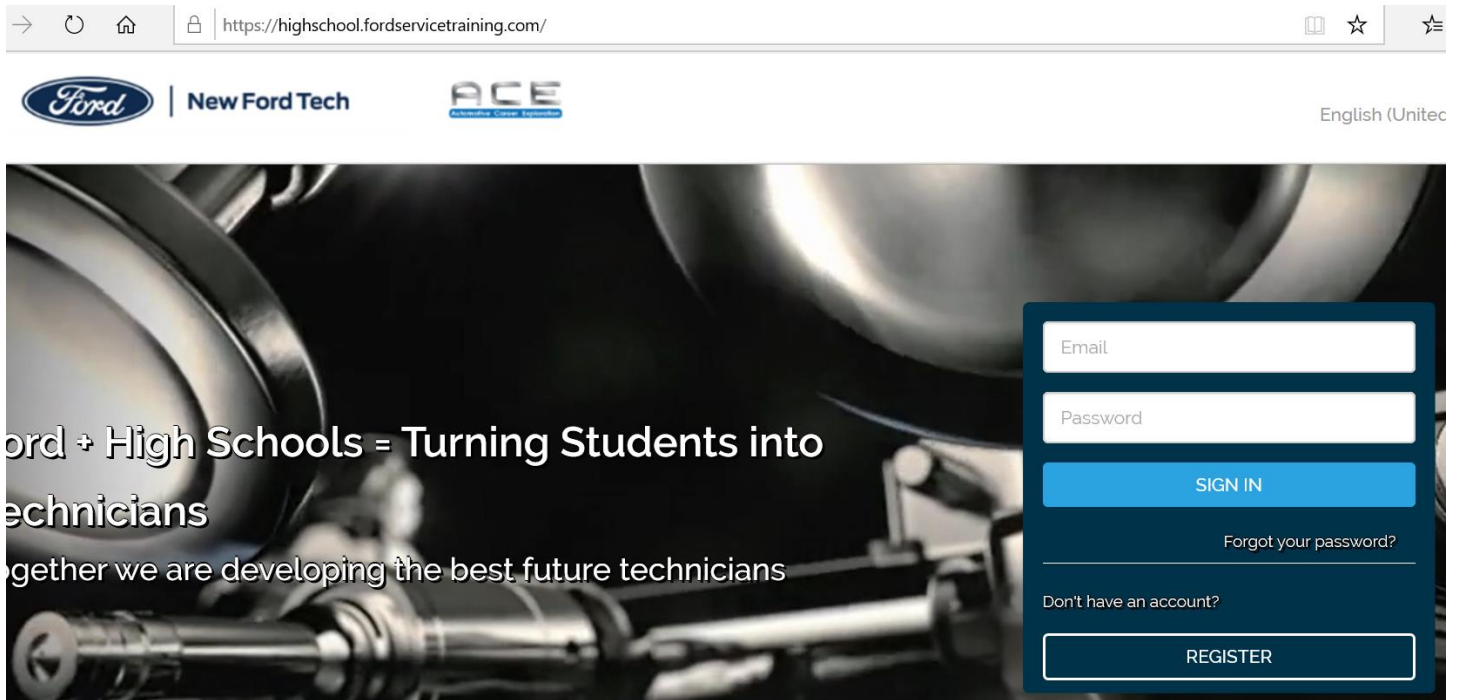

Good Afternoon Automotive Technology. I hope all of you are doing well and staying sane stuck at home. This is a difficult time for our country, our state and our school but our industry is one of the most resilient out there. It is not a time to panic but a chance to capitalize on an unfortunate situation. While the school itself is officially closed, distance learning will now be implemented. Every Instructor has been asked to continue instruction to the best of their ability.

I have made the decision to help all of you improve your employability through our partnership with Ford motor company. While other students around the country are doing remediation and busy work, we will be completing factory training that will connect you with dealerships soon enough. I said we because I will also be participating that way if you have any questions, I will be able to help. All of you are aware of the training that I am referring to but will need help signing up. The following information is what is expected of you in the next week.

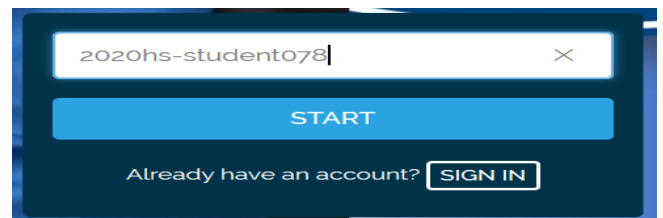

1. Tenth, eleventh and twelfth grade students that are NOT working in a garage will be required to complete a total of 12 hours of training by the end of Friday the 3rd. I recommend logging in every day for 2-2.5 hours of training. This training material is designed by technicians for the use of future technicians so do not be alarmed of the time commitment. This time will pass smoothly with our interest level of cars doubling as inspiration.
2. Twelfth graders and individuals currently working in the field will be required to complete at least 4 hours of YOUR training, (Toyota, Honda, Hyundai, Nissan, etc.) If you cannot access your training, you will need to participate in Ford training for the time being. As previously discussed, you will also need to keep a log of the cars you work on with a description of the repairs performed. This log will also be due Friday the 3rd.

Ford Service Training - Where Your Passion Meets Expertise

TECHNICIAN CAREERS WITH FORD
Working on all of your favorite vehicles

Ford Service Training is offered to you and your school as part of the Ford Automotive Career Exploration Program. To learn more about Technician Careers with Ford, check out NewFordTech.com

5. From this screen you can begin your training. I recommend going in order as it progressively gets more technical. If you pick Ford motor Company, you will see most of the units have times related to them so you will credit accordingly. See the example provided.
