

STEEL CENTER
FOR CAREER AND TECHNICAL EDUCATION

PROGRAM LETTER

Public Safety and Emergency Medicine: CIP 51.0904

Mr. Paul Galon • 2020 – 2021

PGalon@steelcentertech.com • 412.469.3200 x2507

July 1, 2020

Dear Steel Center Family:

My name is Mr. Paul Galon, and I am the Public Safety and Emergency Medicine (PS) Instructor at Steel Center. I have studied and worked in the public safety field including Emergency Medical Services (EMS), Firefighting and Security for over 20 years. I look forward to teaching and helping students with a passion in public safety to develop their knowledge and skill.

Steel Center's PS program prepares students to apply technical knowledge and skills required for performing entry-level duties in EMS, Firefighting, Law Enforcement and other safety services. This program stresses the techniques, methods and procedures peculiar to the areas of criminal justice and fire protection especially in emergency and disaster situations. Physical development and self-confidence skills are emphasized due to the nature of the specific occupation(s). In addition to the application of mathematics, communication, science and physics, students receive training in social and psychological skills, map reading, vehicle and equipment operations, the judicial system, pre-hospital emergency medical care and appropriate emergency assessment, treatment and communication.

Requirement items: Students need to wear duty boots, pants and public safety shirts to maintain personal protection and professionalism. A job shirt will be required for cooler weather. More detailed information about program requirements is outlined in the program syllabus and program brief, which may be found on the school's website: www.steelcentertech.com.

If you have any questions regarding the PS program, do not hesitate to contact me. I am looking forward to a great school year.

Sincerely,

Mr. Paul Galon
Public Safety Instructor
