The Steel Center uniforms policy helps the student maintain a professional appearance while also adhering to the safety of the health department guidelines

Uniform Condition

It is the student's responsibility to ensure that the uniform is clean, free of rips or holes and in good condition. Uniforms should be taken home and laundered weekly or sooner if needed.

Shoes

Students must wear sturdy, low-heeled shoes which prevents slips, falls, trips burns, and cuts. Shoes must be closed toe, fit properly, be secured to the foot (no flip-flops) and non-slip soles.

Hats

Students must be wearing a hat while working in the kitchen. Loose hair should be tucked up into the hat. For longer hair a hairnet and hat may be required for proper restraint.

Apron

Students should always wear a clean apron each day while involved in food preparation. Aprons should always be taken off when leaving a kitchen area.

Jacket and Pants

if students choose to wear a shirt under there jacket, it needs to be white, black or grey with no lettering or images that can be seen through the jacket and hoodies/sweaters are not permitted. This is a common standard in culinary schools and industry to achieve a professional appearance.

Jewelry

The only jewelry allowed in the kitchen by serv safe regulations is a plane band ring. All non-plane band rings necklaces and bracelets must be removed. Earing and piercings are allowed as long as they are not large hoops or long. The instructor reserves the right to have the student remove or ask the student to cover with a band aid any piercing. All smart watches and ear buds are not permitted in the kitchen.

Nails and Nail Polish

Nails are to be kept short and clean. Long artificial nails get in the way of kitchen work and can cause a danger when working with kitchen tools. Any glitter or other decorations on nails poses a health hazard to food production. If nails are painted with a basic nail color gloves must be always worn in the kitchen.

If a financial hard ship exists, please contact your instructor
